

LEGACY SNAPSHOT

Decommission With Confidence

Legacy Snapshot helps enterprises decommission outdated applications without losing critical records, compliance readiness, or institutional knowledge.

Transforms aging systems into structured, tamper-evident document archives that preserve what matters—forever.

THE CHALLENGE

Decommissioning legacy systems is risky, complex, and often delayed—leaving organizations stuck with aging infrastructure, regulatory exposure, and increasing cost.

Legacy systems linger because they hold data that might be needed someday—for audits, legal reviews, or compliance checks. But keeping them alive just in case is costly, risky, and unsustainable.

Traditional solutions like migration or mothballing fall short—either flattening data, increasing risk, or deferring the problem. Organizations need a way to safely decommission without sacrificing compliance or operational continuity.

We Don't Migrate—We Snapshot.

Legacy Snapshot enables IT and compliance teams to safely shut down systems by transforming them into structured, signed, and audit-ready PDF archives.

Each Snapshot preserves not just records, but their full context—screens, reports, documents, and field-level data—captured via automated bots and assembled into human-readable, searchable documents.

-  Audit-Ready
-  AI-Optimised
-  Human-Readable
-  Secure & Signed

Our Snapshots allow organizations to finally shut down aging systems without losing what matters.

LEGACY SNAPSHOT

Decommission With Confidence

WHAT MAKES US DIFFERENT

At Sunset Point, we bring deep, hard-won experience in decommissioning and enterprise content management. We know what it takes to preserve the past without compromising the future.

-  **Preserve Compliance Without the Systems**
Eliminate operational risk while keeping critical data accessible and defensible.
-  **Institutional Knowledge, Immortalized**
Snapshots retain a full view of each record, combining transactional history, system screens, and metadata into structured, readable documents.
-  **Enable a Clean Break to Modernization**
Snapshots provide lasting access to historical data in a portable, AI-friendly format—clearing the way for cloud migration, digital transformation, and operational agility.

Legacy Snapshot 

Legacy Snapshot captures the full context of ageing applications and transforms them into signed, tamper-evident PDFs.

No more technical debt or operational risk.
Just clean, searchable archives you can trust.

READY TO MOVE FORWARD, FASTER?

Don't let legacy systems slow you down. Whether you're planning a system retirement, navigating a merger, or trying to reduce compliance risk—Sunset Point gives you a smarter way forward.

Our proven approach, trusted technology, and experienced team ensure your information is preserved, your risk is eliminated, and your teams can move ahead with confidence.

Let us help you close the past—without compromise.
